TIOXIN™ Anatase Titanium Dioxide  
SA-171 • SA-216

Paper . Rubber . Plastics . UPVC . Masterbatch . Pharma

## TIOXIN™ SA-171 — Technical Datasheet

Property	Details
Grade Type	Anatase Titanium Dioxide
Key Features	Soft bluish undertone High brightness Excellent dispersion Low oil absorption
Applications	<ul style="list-style-type: none"><li>• Paper Coatings &amp; Lamination</li><li>• Rubber Processing</li><li>• Plastic Additives &amp; Compounds</li><li>• General Industrial Applications</li></ul>
Performance Notes	<ul style="list-style-type: none"><li>• Ideal for applications requiring high brightness &amp; low abrasiveness</li><li>• Suitable for sensitive formulations</li></ul>

## TIOXIN™ SA-216 — Technical Datasheet

Property	Details
Grade Type	Premium Anatase Titanium Dioxide
Key Features	High whiteness Superior dispersion Optimized particle size Improved tinting power Low impurities
Applications	<ul style="list-style-type: none"><li>• High-quality Paper Coatings</li><li>• Plastic Compounds &amp; Additives</li><li>• PVC/UPVC Applications</li><li>• Rubber Products</li><li>• Masterbatch (Economy Grade)</li></ul>
Performance Notes	<ul style="list-style-type: none"><li>• Enhanced optical brightness</li><li>• Strong particle uniformity</li><li>• Suitable for glossy &amp; smooth finish products</li></ul>
